

## Nevada Division of Environmental Protection Chemical Accident Prevention Program Data Form: Pre Startup Safety Review

|  | Facility: | Process(es) Covered: | Date: |
|--|-----------|----------------------|-------|
|--|-----------|----------------------|-------|

## **Pre Startup Safety Review Procedure**

| Note current version of the PSSR Procedure (title, date, revision number):      |  |  |  |  |
|---|--|--|--|--|
|   |  |  |  |  |
|   |  |  |  |  |
|   |  |  |  |  |
| Is a PSSR checklist utilized?   |  |  |  |  |
| Is there a system to track PSSR approval and implementation?                    |  |  |  |  |
|   |  |  |  |  |
| Is each PSSR assigned an ID number and is the numbering methodology sequential? |  |  |  |  |
|   |  |  |  |  |

## **PSSRs Performed in Previous 12 Months**

| PSSR ID #<br>(if assigned) | Proposed Change | Issue<br>Date | Approval<br>Date | Implement<br>Date |
|----------------------------|-----------------|---------------|------------------|-------------------|
|                            |                 |               |                  |                   |
|                            |                 |               |                  |                   |
|                            |                 |               |                  |                   |
|                            |                 |               |                  |                   |
|                            |                 |               |                  |                   |
|                            |                 |               |                  |                   |
|                            |                 |               |                  |                   |
|                            |                 |               |                  |                   |
|                            |                 |               |                  |                   |
|                            |                 |               |                  |                   |
